SUMMARY

Full Stack Engineer with 6+ years shipping Node.js and React across logistics, AI, ecommerce, and payments heavy SaaS. Track record building payment integrations, RAG powered AI products, and API gateway architecture at scale for clients in North America, MENA, and Australia. Mentored engineers and owned delivery end to end, from infrastructure to UI.

EXPERIENCE

Teamo | Software outsourcing, Client: Beacon Lighting Group, Australia — Remote
Backend Engineer — *Oct 2025 to Present*

- Built and maintain a KrakenD API gateway in Go, aggregating commercetools and internal services behind unified endpoints for the storefront.
- Develop backend services in NestJS integrated with commercetools headless commerce.
- Manage cloud infrastructure as code with Terraform, provisioning commercetools, AWS IAM roles, and secrets.
- Deliver feature requests and production bug fixes for Beacon's storefront, working with their team directly and through the PM.

AMJ Technology Solutions | Enterprise SaaS for MENA, Abu Dhabi — Remote
Full Stack Software Development Engineer — *Jun 2024 to Oct 2025*

- Built an AI powered chatbot using RAG, increasing lead generation by **30%**.
- Built and optimized MongoDB aggregation pipelines and services, adding indexes to speed up slow existing queries.
- Automated the full billing lifecycle through Stripe and Zoho, covering discounts, upcharges, usage plans, and failed payments, and removing manual invoicing.
- Built customer facing dashboards, websites, and landing pages in React, owning the frontend end to end.

PackageX | Global logistics SaaS platform, Islamabad — Hybrid
Node.js Developer — *Nov 2020 to Jun 2024*

- Built the backend for **Receive**, the last mile delivery platform, from scratch, including OpenSearch analytics.
- Optimized APIs and database queries, improving performance by **25 to 30%**.
- Reduced label purchase steps by **25%** through carrier API integrations.
- Shipped tier based Stripe payments replacing ACH, wire, and checks, making client onboarding and billing smoother.
- Built email systems for the Mailroom and Receive apps reaching **300k+ users**.
- Integrated HubSpot APIs into the admin portal to speed support ticket resolution.
- Mentored 10 interns into productive full stack contributors.

NOTABLE PROJECTS

Beacon Lighting Ecommerce API | Headless commerce gateway
Tech: Go, KrakenD, NestJS, commercetools, Terraform

- Architected the BFF API gateway consolidating storefront services behind KrakenD, with headless commercetools integration and fully Terraform managed AWS infrastructure.

ChatArm | AI Chatbot Platform
Tech: React, Node.js, LangChain, OpenAI, MongoDB

- Built a RAG based conversational chatbot for lead generation and customer support, with automated billing via Zoho.

SKILLS

Backend: Node.js, NestJS, Express.js, TypeScript
Frontend: React.js, Next.js, Redux, Tailwind CSS
Databases: PostgreSQL, MongoDB, Firestore, OpenSearch
Cloud & DevOps: AWS (Lambda, ECS, EC2, S3, Cognito), Terraform, Docker, Jenkins
Integrations: Stripe, commercetools, KrakenD, Twilio, SendGrid, Zoho Billing, HubSpot, LangChain, OpenAI

EDUCATION

National University of Sciences & Technology (NUST) | Islamabad, Pakistan
Bachelor of Science in Computer Science (BSCS) — *2016 to 2020*
